

❖ Company Profile

Gener 2 is one of the largest private construction and infrastructure development companies in Albania. Gener 2 portfolio is diversified in the development of industries such as construction, infrastructure and engineering project management, energy and telecommunications, property management, real estate and media. Over the last 20 years, Gener 2 has left traces in the Albanian and regional markets by developing strategic projects with the highest international standards and at the same time contributing significantly to the country's sustainable economic development.

❖ Job Title

Architect

❖ General description for the position

We are looking for a creative and inspired architect to handle projects from the initial client briefing through to the final stages of construction. The architect's responsibilities include developing and presenting design proposals, preparing drawings, specifications.

To be successful in this position you should be able to visualize space in three dimensions, have a good understanding of construction technologies, and very good CAD skills. An outstanding Architect will have strong interpersonal skills, demonstrate technical design skills and be able to create designs that are functional, creative, and sustainable.

❖ Main Responsibilities

Architect will:

- Design and drafting projects from concept development through to completion.
- Developing and presenting project proposals.
- Preparing drawings, specifications, and construction documents.
- Determining and adhering to budgets and timelines.
- Collaborating with project teams and with other construction professionals.

❖ Experience and Qualifications

- Degree in architecture or a related field.
- Previous experience as an Architect preferred with at least 2 years of experience.
- Excellent technical drawing skills.
- Knowledge of Microsoft Office and software programs such as AutoCAD, Revit, Adobe Creative Suite.
- Good interpersonal and presentation skills.
- Strong creative and visualization skills.
